

INSULATING STAND MODEL N-140

The purpose of the N-140 Insulating Stand is to provide for the mounting of accessories used in demonstrations with a Van de Graaff Electrostatic Generator (WINSKO Model N-100V). At the top of the acrylic insulating rod is a slightly tapered metal post designed to fit into a similarly tapered female part on the bottom of the accessory being attached. The metal hook that extends from the top side of the rod can be used to ground the base of mounted accessories.

The Insulating Stand in the photo at right is shown set up with the Racing Ball accessory (WINSKO Model N-141), sold separately. We offer additional accessories that can be used with the Insulating Stand, such as the Electric Whirl (WINSKO Model N-124-IS), the Lightning Plate (WINSKO Model N-139), and the Volta's Hail Storm (WINSKO Model N-132-IS). Please see the instructions for the specific accessory you are using with the Insulating Stand for the best arrangement and connection.

Please refer to our printed instructions included with the WINSKO N-100V Van de Graaff Electrostatic Generator for descriptions of additional demonstrations. Or, WINSKO now offers a DVD (catalog N-158) featuring video demonstrations and descriptions of our full line of N-100V Van de Graaff Generator accessories. This DVD, as well as the full line of all WINSKO products, may be purchased directly from WINSKO via phone or fax, or through our website at www.winsco.com.
